DEMO
available

here

This is an add-on
for Microsoft Flight Simulator
MSFS, FSX, Prepar3D (All versions)
FS2004 & X-Plane 11 & 10
Voice control for flight
simulator

Your chance to do it like the Pros...

Just added

Support for newly released

PMDG 737 for MSFS

| | |
|--|--|
| | |
|--|--|

**The ultimate
Multi
Crew Experience**

**We are pleased to introduce, Multi Crew Experience, an add-on to
award
winning Microsoft, Lockheed martin and Laminar flight Simulators. Works
with FSX, Prepar3D (Including V4), FS2004 as well as X-Plane 11 &
10.**

**By combining different technologies, we aim to add that little
bit of excitement to the overall flight simulation experience.**

**Whether you are a flight simulator enthusiast, looking for more realism,
real pilots temporarily grounded due to economic downturn, or simply
want to enjoy what the product has to offer; we
believe you will
find a purpose to this outstanding application.**

**At the core of the product, is the use of speech recognition
technology.**

**Perhaps you're a real world pilot temporarily grounded as a result
of Coronavirus crippling your airline operations. What a better way
to keep your sharpness.**

**This is a product that will give you the opportunity for a Multi Crew
Experience. You will never fly those heavies alone again.**

**This isn't a scripted adventure with you needing to fit in. You call
the shots.**

**It's a fully interactive crew simulation. You can ask co-pilot to perform
what you want, when you want, and even using custom speech if you
want.**

It's the closest you can get to shared cockpit, with a co-pilot who

is type rated on more than 40 complex aircraft..

<p>· Works across a wide range of systems, Windows 10, Windows 8, Windows 7, or Vista, 32 or 64 Bit, English or foreign editions, with Microsoft flight simulator, Dovetail FSX Steam, Lockheed Prepar3D and Laminar reesearch X-Plane.</p>

<p>· It does what it claims.</p>

<p>· It's feature rich, and provides the ultimate Multi Crew Experience.</p>

<p>· You can talk not just to your co-pilot, but to native ATC, Radar Contact controllers, as well as Pro Flight Emulator ATC controllers, not to mention mechanic and cabin crew. </p>

<p>· Supports many third party complex aircraft add-ons. And the list is growing. All popular ones are covered</p>

<p>. It runs outside the simulator process. There is no chance of spoiling a very long flight due to a bad voice command. </p>

<p>· You don't need a quad core machine to run it. It is very lean and mean with system resources.</p>

<p>. It's based on real talk, and you'll hardly need to read the manual to get started. Very high flexibility with regards the way you speak the various commands. </p>

<p>· It comes with a professionally designed installer that will get you up and running in minutes.</p>

<p>· Has a fully working demo available for download. </p>

<p>We believe, this product greatly improves the realism of home flight simulation.</p>

<p>Thank you.</p>

<p>The FS++ team.</p>

<div id="sub_container2">
<div class="content" id="content_container">
<p><u><strong><span style="font-size:14px;">Multi  Crew
Experience User
Interface screenshots</span></strong></u></p>
<p>Bear in mind, that the user interface is only a tiny part of the
application,
and you will only interact with it a couple of times, mainly to setup
your preferences. The core of the program lies in
the invisible part working in the background.</p>
<p>The General Page, where Application Features can be enabled or
disabled,
and various options can be set.</p>
<p>If running a non-English edition of Windows or the flight simulator,
you will see a couple of flags that allow you to switch the user interface
language between English and any of the following languages, German,
Spanish, French, Italian and Portuguese.</p>
<p></p>
<p> </p>
<p align="center"></p>
<p></p>
<p>The Command page, where you can select one of the installed voices
to use for crew members. Choose from 7 recorded high quality voice
packs,
including English US, UK, Australian, German, and French accents.</p>
<p> You can also fine tune the speech recognition engine.</p>
<p></p>
<p> </p>
<p align="center"></p>
<p></p><p></p><p>The Checklist page, where you can see the different
headers available. You can also select your own custom made
checklist.</p>
<p></p>
<p> </p>
<p align="center"></p>
<p></p>
<p>The ATC page, for selecting the options you think are better for you.

```

Note the possibility of using a joystick button, as a push to talk button, for message transmission. So, it is time to get away from those bad habits, of reaching out for the keyboard to interact with ATC!</p>
<p></p><p></p>
<p></p>
<p> </p>
<p align="center"></p>
<p>The monitor page, where you can specify the proficiency level you are seeking, and set some operational parameters.</p>
<p></p>
<p> </p>
<p align="center"></p>
<p></p><p></p><p>The Simulator page, where you can select the different elements of the user interface to be controlled by voice.</p>
<p></p>
<p> </p>
<p align="center"></p>
<p></p><p></p><p></p><p></p><p>Finally, the About page, that just gives an overview of your hardware setup.</p>
<p></p>
<p> </p>
<p>MCE can be minimized to a very narrow window, taking little screen space.</p>
<p></p>
<p>It's also completely hidden when the simulator is in full screen mode.</p>
<p>MCE ships with a variety of tools that help you accomplish things</p>
<p><u>VoxKey:</u></p>
<p>Voxkey is a tool that allows you to create your own voice commands that will be converted to keyboard strokes.</p>
<p>It's a bit like getting a free VoiceBuddy dedicated to FSX & FS9</p>
<p></p>
<p> </p>
<p></p>
<p> </p>
<p><u>Speech training tool:</u></p>
<p>MCE ships with a speech training tool that allows you to train your voice on custom words and sentences</p>
<p></p>
<p> </p>
<p> </p>

x737 NG	<div align="center"> IXEG </div>
737-300 Classic	<div align="center"> Toliss </div>
A319, A321, A340	<div align="center"> Laminar Research </div>
All default X-Plane 10 aircraft including ZIBO mod	

No complicated setup, simply download, unzip, and run Setup.exe.

Hardware requirements:
 If your computer can run the simulator, you will be able to run MCE.
 You will definitely need a Headset with noise cancelling microphone.
 It doesn't need to be of the expensive variety.
 A decent sound card, even onboard one.
 About 1.8 GB free space on hard drive for a complete installation that would include all voice packs.
 In any case, we give you the opportunity to try it out, so you will be in a better position to assess the package against your hardware configuration.

Software requirements:
 Depending on the desired package, you will need Microsoft Flight Simulator X, Prepar3D, FS2004, or X-Plane 10.

package released, some users may run into some issues that we could not
foresee. But our team will be more than happy to address them. All you need
is&nbsp;<a title="Ask question, or report problem with this application"
href="mailto:support@multicrewxp.com">support@multicrewxp.com</a></p>
<p><strong><em>For those not eager to read lengthy manuals, stay
tuned,
as we plan to release a few HOW TO videos.</em></strong></p>
<p><em><strong><i><b><u>General Tips &
Tricks.</u></b></i></strong></em></p>
<p><em><strong>You do not need to press the joystick button( or even
own
a joystick) to talk to the co-pilot. You only need that for ATC transmission,
and that is just for more realism. . The alternative is to use the &lt;DEL>
(delete)
key of the keyboard for ATC transmission, and ATC only, not for checklist
or anything else.</strong></em></p>
<p><em><strong>We strongly recommend using the application with the
default
settings initially, before tweaking it.</strong></em></p>
<p><em><strong>You may also want to disable the "Call-outs and
monitoring"
feature, found in the "General" tab of the user interface,
until you are comfortable with this add-on. It will stop the co-pilot
constantly telling you off when you are struggling to keep that speed,
heading or altitude as set on the autopilot control panel. Disabling
this feature may also help slower systems fare better, as it is CPU
intensive.</strong></em></p>

```

<p> </p>
<p> </p>
<p align="center"></p>
<p> </p>
<p>Q: I get this message when running MCE, "Could not load speech file, "file_name.cfg""</p>
<p>A: You need to make sure the speech engine is set to US English, and not UK English, or any other localized English variant. You do that through the Windows Control Panel, and "Speech" utility. </p>
<p align="center"> </p>
<p align="center"></p>
<p> </p>
<p>Q. Talking to ATC yields nothing.</p>
<p>A. To use the ATC feature, you need to press a joystick button, hold it down while transmitting, and release it when done with your message. If you don't have a joystick, the DELETE key of the keyboard can be used for that purpose.</p>
<p align="center"> </p>
<p align="center"></p>
<p> </p>
<p>Q. How to get the best out of the ATC feature?
</p>
<p>A. Most issues with ATC are call sign related. Have you tried ATC training?
It is accessible from the start menu. You will have the opportunity to spell a lot of airline names so that they can be better recognized.

Example: Say your call sign is American 4325

You could say any of these:</p>
<p>American four three two five
</p>
<p>American forty three twenty five</p>
<p> American four three twenty five</p>
<p> American forty three two five
</p>
<p>Although you can call ATC bodies by their complete name, like Heathrow Tower, charles de gaulle ground, you will be more successful, when transmitting,
if you just refer to them as Ground, Approach, Tower, Centre. And it is more of an issue when the name is not English.</p>
<p>Having said that, we are prepared to look at the ATC grammar, and would consider a revision if needed.

We are also open to suggestions, on which voice commands to include.

Another suggestion, is to look at the "Command" tab of the UI, and set the speech pace to your liking.

 If you tend to speak slowly, move slider towards slow.

 If your speech pace is fast, try moving it towards fast.</p>
 <p align="center"> </p>
 <p align="center"></p>
 <p>Q. What happens if my system is fitted with more than one sound card.</p>
 <p>A. In that case, you could use the "Assign Sound Device" tool provided.</p>
 <p>Click Start->All Programs->Multi Crew Experience->Tools->Assign sound device.</p>
 <p></p>
 <p>Select the correct input and output to be used by MCE. </p>
 <p align="center"> </p>
 <p align="center"></p>
 <p> </p>
 <p>Q: I cannot select the "Microsoft Speech Recognizer 8.0 for Windows (English - US)", because it's not there, on my system.</p>
 <p align="left">A: If running English distribution of Vista, make sure you have installed Vista Service Pack 1. If it is till not there, google "US English Language Pack for Vista", for instructions on how to proceed.</p>
 <p align="left">If you are running a non-English distribution of Vista or Windows 7, the assumption is that you are running the Ultimate or Enterprise editions, that you have installed service pack 1. You also need to install the US English Language pack.</p>
 <p align="center"> </p>
 <p align="center"></p>
 <p> </p>
 <p>Q: I am running a non-English version of the Flight Simulator (Spanish, German, French etc...), and all ATC strings are now showing in English. They used to display in my native language. Is this normal?</p>
 <p>A: While we won't tell you by which magic we accomplish this feat, yes it is done on purpose, so that you can practice ATC in the most widespread, and official language. With English ATC phraseology, you can fly anywhere in the world. </p>
 <p>To revert back to normal, un-install MCE, and manually delete "fsInsider.dll" from FS9\Modules\ folder, or FSX folder, depending on the simulator you are using.</p>
 <p> </p>

class="content" id="content_container"><p>Q: <u>What is Multi Crew
Experience?</u></p>
    <p align="left">A: Multi Crew Experience is a new add-on to the award
    winning, Microsoft Flight Simulator 2020, FSX, Prepar3D and FS9 software.
    It adds the missing elements, like crew coordination, interactive checklist
    reading, realistic ATC operation, call-outs and warnings against deviation
    from standards, as well as extras, like user interface voice control.</p>
    <p align="left">Q: <u>Who may benefit from this application:</u></p>
    <p align="left">A: Anyone who wants to make the home flight simulation
    experience as real as it can get. Trainee pilots can use it as a tool
    to practice multi crew interaction and ATC phraseology. </p>
    <p align="left">One of the bad aspects of home flight simulation, is that it
    makes you&nbsp;breed bad habits, like&nbsp;trying to fly a B747 on your own,
    or looking for keyboard key strokes to interact with ATC.</p>
    <p align="left">For non native English speakers, this constitutes a great
    practice tool. If you are seeking an international career, as an airline
    pilot, you must&nbsp;interact well with other crew members,&nbsp;in

```

```

    atc4=1<br>
    atc5=0<br>
    UseRadarContact=1<br>
    IgnoreRC4Registry=1</p>
    <p align="left">Save the file.</p>
    <p align="left">The next time you start MCE, it will prompt you to provide
    the RC4 installation network path. Please do so, and it will be saved.</p>
    <p align="left">In a networked scenario, you must make sure Radar
contact
    is started first, flight plan loaded, and "Start RC" button
    pressed, before attempting to start MCE.</p>
    <p><u>Q: Do i have to be online to use this product?</u></p>
    <p>A: No, this is a desktop application. Therefore you don't need an
Internet
    connection at all.</p>
    <p><u>Q: What is this "DIALOG MODE" thing?</u></p>
    <p>A: Whenever a flight simulator dialog box is displayed (weather dialog,
    aircraft dialog, etc), MCE switches to "DIALOG MODE", a state
    where only commands to interact with dialog boxes are enabled. You will
    not be able to interact with co-pilot in that mode. As soon as the dialog
    is closed, MCE will revert to "FLIGHT MODE". If for some reason,
    MCE is stuck in dialog mode, right click the user interface, then select
    "Force Flight Mode" option in drop down menu.</p>
    <p><u>Q: Does MCE interface with Radar Contact or ProFlight Emulator
ATC?</u></p>
    <p>A: Starting from Version V2.0 you can interact with Radar Contact ATC
    as well as Pro Flight Emulator (PF3/PFE) ATC using speech
    recognition.</p>
    <p>&nbsp;</p>

```

        </object></p>
        <p>&nbsp;</p>
        <p>Note that we could have done the following....</p>
        <p>Take the fastest PC around</p>
        <p>Use the most expensive headset</p>
        <p>Add background music to distract a bit</p>
        <p>Take multiple shots</p>
        <p>Edit out all the stuff that didn't go well</p>
        <p>..... Ending up with the sort of promotional videos designed to
        sell a dream.</p>
        <p>We take a different approach here. The product is in your hands,
available
        as a TRY BEFORE YOU BUY, and the videos will just help you get familiar
        with voice commands. They are not designed to impress.</p>
        <p>There will be misheard commands, repeats, mistakes, basically the sort
        of things you will be going through using the real product. In fact
        your own experience will very likely exceed the expectations on the
        videos.</p>
        <p>&nbsp;</p>
